Clinical Laboratory Medicine Course

NDCLS runs the Laboratory Medicine Course which is delivered in a 9 week block to 160+ Oxford medical students in year 4 of the BM, BCh programme.

The teaching is delivered through structured sessions including lectures, small group teaching, large group practical classes as well as autopsy and other demonstrations. At the end of the course there is an examination which is the first part of the staged assessment for BM part 2. In the 2015 National Student Survey for Medicine, the course was rated the highest in the UK for the 8th consecutive year.

Directions to the JR site administration office

The NDCLS administration team is situated on Level 4 of the Academic Block, within the John Radcliffe Hospital site. On arrival at the John Radcliffe Hospital (main entrance), go to the central lifts and take a lift to Level 3. Follow the sign towards the George Pickering Centre, continue along the Academic Street, level 3. When you see the Cairns library, open the door on your right (NDCLS should be signed), and go up one flight of stairs (level 4) where NDCLS main offices and labs are located. Administration is found at the end of the corridor (left for finance and senior administration, right for personnel).
